200 LITRE
PUMP UNIT

DATA SHEET

FOR HIGH/MEDIUM VISCOSITY RTV SILICONE DISPENSING

This 23:1 ratio 200 litre balanced output pneumatic pump has been specifically designed to provide uniform dispensing with minimal bead distortion.

The Check-Mate 200 fluid pump lower section demonstrates minimal drift from perfect balance between both the upward and downward pumping strokes to provide improved efficiency as well as a smooth flow pattern over a wide range of fluid viscosities.

Supplied complete with fluid hoses of various lengths and a selection from our extensive range of application guns or metering valves, Meter Mix® are able to offer a complete solution for the dispensing of medium to high viscosity RTV silicone sealants directly from their original 200 litre size drums. For extremely high viscosity materials or when utilising long fluid hose runs, the pump unit is also available as a 46:1 ratio.

PTFE lined fluid hoses are available in various lengths and diameters.

APPLICATION GUNS & VALVES

Palm grip tip-seal flow gun

Pistol grip tip-seal flow gun

Automatic metering valve
